INFRARED GUN

CDN expands its line of infrared thermometers with the handy Infrared Gun (IN1022). Offering convenient point-and-measure precision, the Infrared Gun gives foodservice operators the assurance that the surface temperature will be read with pinpoint accuracy, without coming in contact with food.

Perfect for a multitude of foodservice applications, it features a one-second response time that makes this ideal for measuring surface temperatures of food and checking temperatures of food being served or stored in the refrigerator or freezer.

Simply point the gun at the item to be measured, press the trigger, and within a second the unit provides an accurate temperature reading.
The backlit display measures 7/8" x 1", making it easy to see. Because there is no contact with the surface of food being measured, the gun eliminates the potential of cross contamination.

FEATURES

- 1-second response
- Maximum, minimum, difference, average with lock for continuous scanning
- 8-beam laser target illumination
- Distance:spot = 12:1
- Backlit

SPECIFICATIONS

Measurement Range:	-76 to +1022°F/-60 to +550°C
Display Size:	0.875 W x 1.0 H (in)/ 2.2 W x 2.5 H (cm)
Power:	2 AAA batteries included
Weight:	5.9 oz/167.3 g
UPC:	0 18436 00571 1
Other:	• Memory • Data-hold • One-button operation • High and low alerts • Battery status indication • ABS plastic • Auto-off
